UNIVERSITY PROJECTS

Makeitalia Supply Chain Game: Among 1,200 management engineers, I led my group to the national finals, finishing in the top 20 in Italy. Interacting with seasoned managers, I obtained key insights for my career and personal growth.

AnyLogistix Software: Optimized supply networks within a constrained scenario, resulting in a 7% revenue increase.

Board: Environment analysis — Recommended 4 new KPIs to C.A.M.P.I. Srl and insights to enhance their dashboards.

UMANA: Used deep learning tools to correlate internal data with external factors to identify revenue drivers and determine optimal locations for new branches.
